EXPERIENCE

PricewaterhouseCoopers Ltd | BXT Experience Consultant Intern
Oct 2019 - Dec 2019 | New Delhi, India
- Worked in the Business Experience Technology division leveraging emerging technology for clients through business development and product management.
- Designed and implemented a global CRM app on Microsoft Teams with insights on Power BI leading to a potential 50% reduction in support tickets.
- Assisted in the PoC for a networking protocol including building out technical specifications and sourcing motherboards for a telecommunication company.
- Involved in the RFP for technological investments in the Government of Odisha which was presented to top state officials.

Planto | Software Engineering Intern
Oct 2018 - June 2019 | Hong Kong
- Worked on the front-end in React Native + TypeScript, collaborating with the design team to build reusable screens/ components and new features for mobile.
- Maintained the Java Spring Boot back-end, scraping data from all 30+ financial institutions in HK using Selenium while mitigating user login errors with Bugsnag.
- Side project -- Created a Cohort Analysis akin to Google Analytics which tracked retention for users on a weekly/ monthly range through Firebase Cloud Functions.

Neat | Software Engineering Intern
Jun 2018 - Sep 2018 | Hong Kong
- Worked on the React app for the Customer Service Dashboard, and implemented additional features to automate parts of the credit card approval process.
- Created a Ruby tool which outputted a standardised JSON file out of the Google Spreadsheet, removing inconsistencies and human error, saving developer time.

PROJECTS

Nuked Studios | Co-Founder
Apr 2014 - May 2018 | New Delhi, India
- Developed websites for companies as a full-stack web developer
- Focused on creating an online presence for startups through targeted marketing strategies and end-to-end solutions
- Awarded Karmaveer Chakra in association with the United Nations

TrumpTracker | Web Stack/ React Native for iOS
- Follows Donald Trump's Electoral Promises. Published iOS app
- Featured in Product Hunt, GQ, Huffington Post, Mashable, Reddit/ Hacker News
- Top SERP worldwide, organically. Open source, 330+ stars on GitHub

Cydia Repository | Bash/ iOS Development/ Theos
- Cydia Repository for overriding Apple's boot loop animations.
- 60+ .deb's serving thousands of jailbreakers with an active community on Reddit
